

Greetings!

I would like to introduce our organization, the Texas Association of Professional Process Servers (TxAPPS), and extend an invitation for you to join us.

We are a non-profit association that is governed by its members. Our organization was founded to protect and expand the interests of certified process servers in the State of Texas. The process server certification program has come a long way over the past few years, but we still have a long way to go. Through legislation and by working with the Judicial Branch Certification Commission, we will continue to cement our place in the Texas legal community and transform the process service industry into a profession.

We also intend to protect and advance our interests by working with the other members of the legal community in our state; including attorneys, paralegals, court reporters and others. We will strive to educate these groups on the need for certified process servers and make them conscious that they have a vested interest in the rules that regulate the process service industry in Texas. Unlike previous organizations in our state, we are extending an invitation to all members of the legal community to join our organization as Partnering Members. We welcome their knowledge, perspective and, most importantly, their support.

Please visit our website [www.txapps.org](http://www.txapps.org) to find out more about our organization including our bylaws and code of ethics.

We would love for you to join us.

Thank you!

Travis Wyatt  
TxAPPS President, 2017
